Disclosure

Speaker name:

.....

I have the following potential conflicts of interest to report:

- Consulting: Cook medical; Optimed GmbH; BD; Volcano/Philips;
Vesper Medical; Bentley; Straub
- Employment in industry
- Stockholder of a healthcare company
- Owner of a healthcare company
- Other(s)
- I do not have any potential conflict of interest

Major goals

- Prevent early occlusion
 - Think Virchow
- Control post-operative pain
 - Stents, definitely dedicated venous stents with high radial force
- Diagnose re-occlusion early
 - Fresh thrombus is easier to remove

Prevent early re-thrombosis

- Anticoagulation¹
 - LMWH
 - DOACs
 - Vit. K antagonists
 - Antiplatelets
 - Combination
 - Duration between 3-6M, till lifelong
- (Pneumatic) compression
 - External calf stimulation
- Mobilization
 - 2 hours bed rest suffices
 - Calf activation is strongest flow stimulation

Post-Stenting Pain Syndrome

LINC

Post-Stenting Pain Syndrome

LINC

Post-Stenting Pain Syndrome

LINC

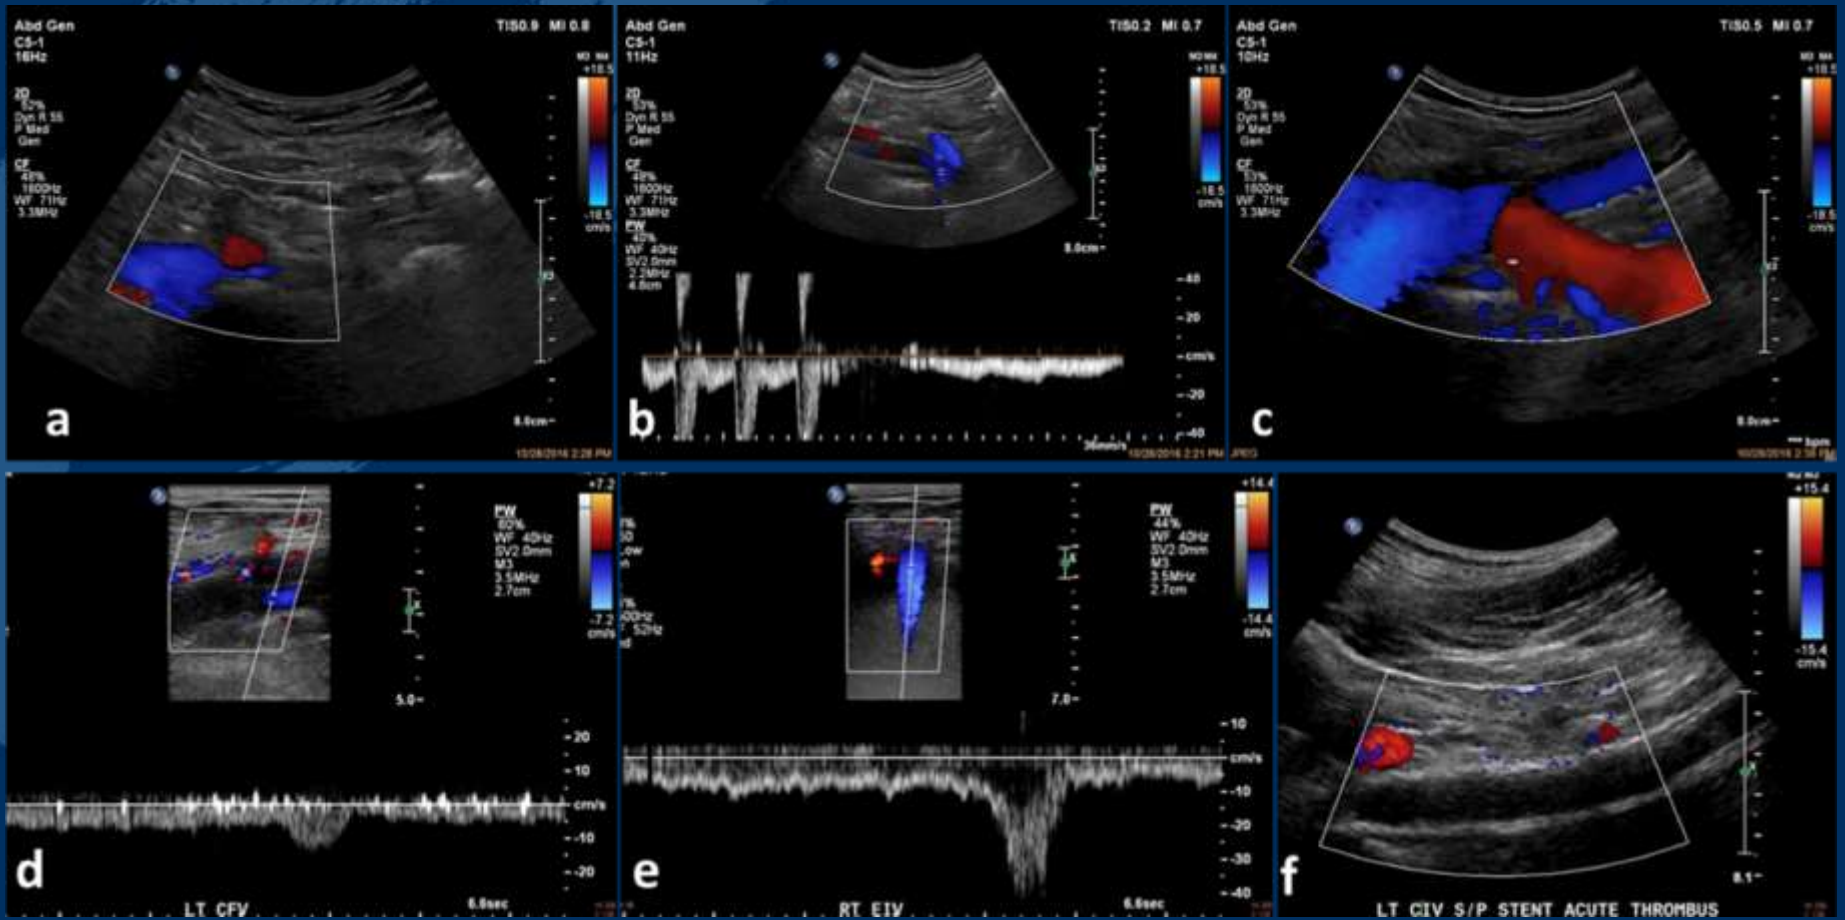

Post-Stenting Pain Syndrome

LINC

Regular Follow-up US

First control next day before discharge
 First visit after 2 weeks!

4 Weeks Stent occlusion

LINC

Summary

The logo for LINC (Lung Cancer Intervention and Prevention) is located in the top left corner. It features a stylized graphic of a red and orange flame or ribbon shape, with the letters "LINC" in white capital letters to its right.

LINC

- It doesn't stop after stenting
- Stenting however may start your problems
- Accurate surveillance allows accurate treatment

The logo for LINC (Lifestyle and Interventional Nursing Clinic) is located in the top left corner. It features the letters 'LINC' in a white, sans-serif font. To the left of the text is a stylized graphic consisting of three curved, overlapping bands in shades of red, orange, and yellow, set against a dark blue background.
