Any discussion regarding Becton, Dickinson and Company products during the presentation today is limited to information that is consistent with the Becton, Dickinson and Company labeling for those products. Please consult Becton, Dickinson and Company product labels and inserts for any indications, contraindications, hazards, warnings, cautions and instructions for use.

The opinions and clinical experiences presented herein are for informational purposes only. The results from this case report may not be predictive for all patients. Individual results may vary depending on a variety of patient specific attributes.

The physician has been compensated by Becton, Dickinson and Company to participate in this presentation.
Case 1
7 weeks later

Brachial V. 1

Connecting V.

Brachial V. 2

Cephalic V.
9 weeks later
Angioplasty + Coiling
Case 2
Cephalic Vein
Radial Artery
Anastomosis
Radial Vein
Basilic Vein
One Month Later
Cephalic Vein

Radial Vein

 Anastomosis

Radial Artery
4mm DORADO High Pressure Balloon
5mm LUTONIK DCB
Angioplasty
Case 3
Thrombosed EndoAVF
Tools:
Angled Hydrophilic Catheter
0.014 Wire
Low pressure 5X100mm
Balloon inflation for 4 minutes
Check Outflow Veins
Cephalic Vein

Perforator Vein

Brachial Vein

Basilic Vein
Coil the Brachial Vein
No Stenosis in the Juxta-anastomotic Region

Great Cephalic Vein Outflow

No Deep Vein “Stealing”
Thrombectomy + Angioplasty + Coil
